

# ALLL+

ALLL+ helps you to anticipate and meet the challenges of ever-shifting financial regulation, understand your credit risk, and maintain regulatory compliance. Our cutting-edge technology combines your business data with rich product features and functionality in a single platform to enable deep analytics, advanced modeling, and rapid, accurate reporting.

## The market challenge

Complying with complex and ever-changing financial reporting requirements like CECL and IFRS9 creates difficult operational and data challenges for businesses investing for growth, heightening their legal and reputational risk.

### Answer your next “what if” questions

- Anticipate future changes with the latest analytics to enrich business-led decisions, deepen insights and unlock more value from your data
- Benchmark your performance, combining your current and historical data to create a challenger model and build a highly accurate view of risk and allocation needs
- Identify and respond in real-time to nonconforming data structures that impact the quality and speed of your downstream allowance process
- Establish and maintain compliance across all business areas to reduce your credit, regulatory and financial reporting risks
- Innovative automation simplifies complex processes and enables concise, intuitive workflows to save time and reduce workload
- Flexible and uniquely scalable to ensure seamless, transparent implementation of CECL and IFRS9

### Make your data work for you

- Single integrated platform with end-to-end credit modeling, disclosure reporting and analytics
- Build your allowance data hub, discover data anomalies and maintain ongoing data integrity
- Self-serving technology combines user autonomy, model transparency and governance framework
- Credit modeling for all asset classes integrates macro views, qualitative matrix, cash flow projections and allowance attribution insights
- Real-time analytics measure and monitor period changes, risk classification movements, sensitivity behavior, and allowance results
- Drive business insights to support strategic initiatives and decisions and plan for all eventualities using the scenario manager module
