

Co-Sourcing

Co-sourcing represents the next step in the evolution of fund administration, bringing together the best of outsourcing and insourcing.

Under our **co-sourcing** model, we put the strength of more than 5,000 fund specialists to work for you, handling your back and middle-office operational activities while you retain control over your technology stack and data.

Freedom plus control

Outsourcing frees you from daily administrative responsibilities so you can focus on strategy and growth without distractions.

Co-sourcing gives you the same benefits, but you retain ownership and control of your data. Data confidentiality, integrity, and security remain fully in your hands.

Eliminating the back-and-forth data flows between you and your administrator gives you real-time access to information and cuts the communication delays that can affect relationships - and your reputation. And because co-sourcing reduces operational costs, it can enhance your ability to scale.

Learn how co-sourcing helps you navigate market challenges. Contact us today.

Meet every reporting milestone

Whether you use Investran, Allvue, eFront, or Yardi, we'll retrieve, create, and modify the information required to perform stakeholder management functions. We'll prepare every report, statement, and projection you need accurately and according to industry best practices, just like we do in traditional outsourced relationships. You'll never miss a beat or have to worry about deadlines or compliance.

In addition, by integrating your data with Alter Domus' administrative services, you'll get a clear, 360-degree view of your operations. That's more insight for better, more confident decision-making.

As platform super-users, we can even help you introduce new technology to your organization.
